

National Agency for the Valorization of Hydrocarbon Resources
ALNAFT

Study Agreement process

Introduction

Study Agreement

Opportunities presentation Meetings

More than 10 Opportunities Proposed

Data-rooms scheduled

More than 1 To of data

Since 2017, the ALNAFT agency has adopted a new approach for the promotion and enhancement of investment opportunities through the conclusion of study agreements to assess the hydrocarbon potential of the Algerian mining sector.

The purpose of this new approach is to:

- Minimize risk on the project by carrying out a study before any commitment by the company,
- Confirm the hydrocarbon potential and the economic viability of the proposed projects;
- Improve knowledge and understanding of the hydrocarbon mining sector.

At the end of the study agreement, and if the interest is confirmed, ALNAFT will support the company during negotiations with SONATRACH for the conclusion of a hydrocarbon contract.

Study agreement process

4. DATA ROOM

A Data Room is scheduled in order to allow the company to review the data available on the selected areas. Two possible options: Physical Data Room or Online Data Room.

3. OPPORTUNITIES PRESENTATION MEETING

A technical presentation of the opportunities is organized and technical datasheets are provided.

2. CONFIDENTIALITY AGREEMENT

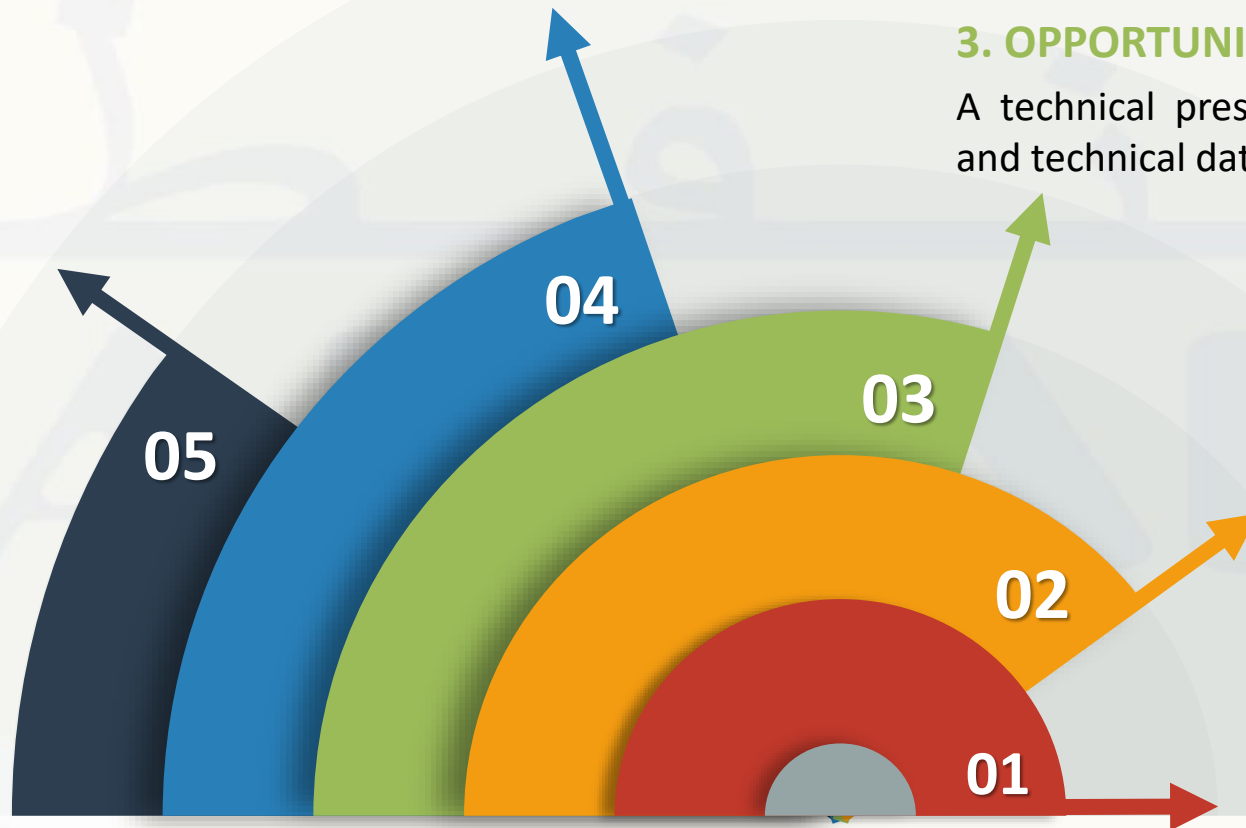

A confidentiality agreement for data access is signed between ALNAFT and the company.

1. EXPRESS OF INTEREST

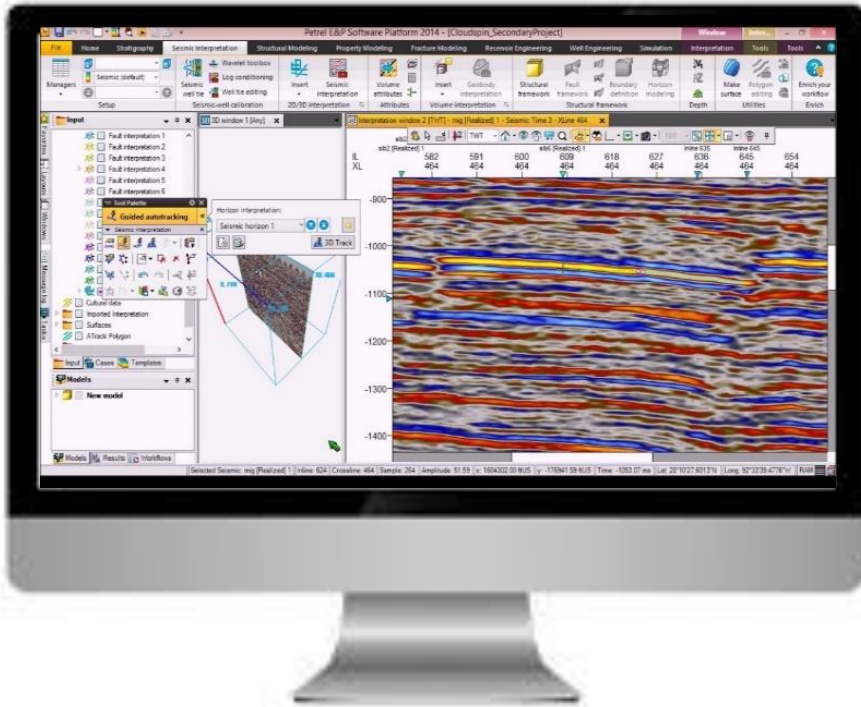

The company expresses its interest in a meeting or by email or by mail.

5. CONCLUSION OF THE AGREEMENT

A study agreement on the area of interest is signed between ALNAFT and the company. The available data are provided to the partner free of charge.

How the Data Room works

A dedicated space to the physical Data Room (up to 12 people).

Up to four (4) workstations + two (2) desktops available.

Seismic and well data previously loaded on G&G platform (PETREL software).

Directory of all available data, structured by area.

Otherwise, there is a possibility to view the data on a virtual data room

NB : Technical data are not given to the company until the study agreement is signed.

Data Available

REPORTS

- End of well reports,
- Proposal report,
- DST
- ... etc.

SEISMIC

- 2D seismic,
- 3D seismic,
- VSP,
- Navigations,
- ... etc.

STUDIES

Reports of previous studies on the areas of interest.

WELLS

- Logs,
- Master logs,
- Wellheads,
- ... etc.

CULTURAL

- Location maps,
- Hydrocarbon mining domain maps,
- Shapefiles,
- ... etc.

*: If available.
